Triple Trust® Sheep Mineral is a 2 to 1 calcium to phosphorus mineral to be self-fed to sheep or mixed with the roughage or grain portion of the ration. One (1) ounce of this product provides 0.7 mg of supplemental selenium.

SELF-FED FEEDING: Feed at the rate of 1 ounce per head per day. Provide one covered mineral feeder for every 20 to 25 animals. Mineral feeders should be located near a clean, fresh source of water. Mineral intake will vary depending upon the mineral status of the sheep. If intake exceeds 1 ounce/head/day reduce the number of feeding locations and/or move them further from water and loafing areas.
