## Instruction for Feeding

This mineral meets the University of Kentucky BEEF IRM recommendations for a basic cow-calf mineral.

Self-feed to beef cattle on pasture in a covered mineral feeder to keep mineral dry. Consumption should be 3 oz per head per day and will provide the maximum daily intake level of 3 mg of selenium per head per day. This 50 lb bag should feed 20 head for approximately 13 days. Minerals should be located near a clean source of drinking water. Feed only according to label directions. This mineral is designed for a specific use in beef cattle on pasture.

This product has been formulated according to the formulation specifications set forth by the University of Kentucky.

For additional information contact your Herdbuilder™ representative.

**CAUTION: Use as Directed.** Consumption of selenium should not exceed 3 mg per head daily.

**WARNING:** This product, which contains added copper, should not be fed to sheep or any species with a low tolerance to supplemental copper.
