Feeding Directions

Self-Feeding: Offer Herdbuilder™ 16:8 Mineral with Cinnamon Garlic on a self-fed basis. Cattle should consume an average of 2 to 4 ounces per head per day. Provide one covered mineral feeder for every 20 to 25 animals. Mineral feeders should be located near a clean, fresh source of water. Mineral intake will vary depending upon the mineral status of the cattle.

Mixing Directions: Thoroughly mix the following levels of Herdbuilder™ 16:8 Mineral with other feed ingredients to yield one ton of feed:

Daily Feed Intake (lb/head/day)	Herdbuilder™ Mineral (lb/ton)	Other Feed Ingredients (lb/ton)
1	250-500	1750-1500
2	125-250	1875-1750
5	50-100	1950-1900
10	25-50	1975-1950

The amount of this product used to balance the ration will depend upon the mineral levels of the ingredients and the stage of production of the cattle.

For additional information contact your Herdbuilder™ representative.

CAUTION: Follow label directions.

Consumption of Selenium should not exceed 3 mg per head per day. Feeding 4.0 oz. of this mineral will provide 3mg Selenium per head daily.

WARNING: This mineral, which contains added copper, should not be fed to sheep or any species with a low tolerance to supplemental copper.
