DON'T LET GRASS TETANY MAKE HIM AN ORPHAN

TT4001

Feeding directions: Cattle Mag BioPlex® Pressed Block is designed to be self-fed to cattle consuming medium to higher quality forage that poses a risk of grass tetany. Consumption of this supplement will vary depending upon the condition of the animals, quality and quantity of forage being fed and seasonal weather conditions. Cattle will typically consume from 2 to 4 ounces per day. Feed one block per 5-15 animals and at least 2 blocks per pasture to ensure adequate intake by younger, timid animals. Place the blocks within 100 feet of where animals congregate (loafing, grazing, feeding, and watering areas). Feed blocks along with plentiful sources of forage, and clean, fresh water. Feed as the sole source of salt, minerals or vitamins.

SEL-PLEX® FlyGuardX™ BIOPLEX®
